Czech Corps had same organization while fighting during World War II in USSR.

Until recently divisional artillery consisted of :

- 1 - 105-mm Howitzer Regt
- 1 - 76-mm AT Battalion (motorized)

All signs show that one Arty Brigade (shown above) will be attached to each division.

Tank units assigned to Inf Division:

According to Soviet war doctrine every division should be assigned:

- a) 1 - T-34 tank regiment
- b) 1 Stalin tank regiment

To be able to achieve break-through of light and heavy fortified lines.

Above tanks will be called "Tanks of Direct Support".

It must be assumed that any Czech division entrusted with similar offensive task will be given above tank support.
